Freedom V™ Wireless Guitar Controller

Sony PlayStation Series

Guitar Mania Freedom V Wireless Guitar Controller for Guitar Hero

Smart AutoSense 2.4GHz Wireless Technology
Unlike infrared wireless systems that require a clear line of sight, the Freedom V automatically detects single or multi-user channels and offers a 100 foot radius of true 2.4 GHz wireless connectivity for up to 800 hours of play on one battery pack. No manual channel settings are required!

LED Back-Lit Rocking Rhythm Strum Bar
The Freedom V comes crowned with a rich blue back light behind the strum bar, which adds the perfect touch of class to the owner's guitar rig in dim lighting!

Only Pro Alternative
Guitar Mania controllers are the only alternative high-performance controllers available that are fully compatible with the Guitar Hero software series for PS2!

Patent-pending Button Cluster
Players love the durable hardware and advanced button placement because it lets them kick out the jams without accidentally pausing the game!

Super Whammy System Whammy Bar
Chrome-look whammy bar system is finely tuned and spring loaded with high density coil spring for extreme durability and excellent response!

Smart Sensors
The Smart Bidirectional Accelerator sensor doesn't just feature one sensor-it features two sensors so players can activate the Star Power mode by simply "shaking" the controller!

Advanced Neck Design
FeatherTouch Fret Buttons activate with the slightest touch-no need to depress the buttons all the way; the edge of the ComfortNeck is curved for extra comfort!

Hot Styling
The heavy metal body style and overall design delivers a more balanced look and feel for superior realism and a maximum rock 'n' roll experience!

Environmentally Friendly
All components comply with the new stringent RoHS standard set forth by the European Union.

Product Series

Guitar Mania presents the latest high-performance guitar controllers for use with the hottest PlayStation 2 music game series in history, Guitar Hero! MTV, Gibson Guitar, Vans sportswear and music industry giants have come together to promote the award-winning game into the stratosphere, and, aside from being the only pro alternative controllers available for the game, Guitar Mania controllers make excellent primary or secondary controllers for the game's multiplayer mode. Players demand Guitar Mania controllers for their advanced ergonomic designs, smart electronics, sensuous contours and high-gloss finishes in hot candy colors.

Product Description

The exciting new Freedom V wireless guitar controller offers a 100 foot radius of AutoSense 2.4GHz wireless connectivity for up to 800 hours of play on one battery pack (batteries not included). It includes a patent-pending recessed Start button, which prevents players from accidentally pausing the game, and a finely tuned, highly responsive chrome Super Whammy System whammy bar, which incorporates a heavy gauge coil spring for extreme durability. Players love the feather-touch sensitivity of the butterfly fret buttons on the fast-action neck, and its Smart Bidirectional Accelerator sensor allows players to simply "shake" the controller to enter the Star Power bonus mode of the game-instead of having to play the controller while raising the guitar vertically. The Rocking Rhythm strum bar has been tuned for a tighter feel and a more precise response, and all Guitar Mania controllers are made of environmentally friendly materials, which have passed the stringent RoHS standard set forth by the European Union.

"Guitar Hero might just be the best rhythm game ever made." - GameSpot

Guitar Hero took the Editor's Choice Best of Show prize at the E3 convention in late 2005, and the game has received rave reviews from the toughest gaming critics. GameSpot awarded Guitar Hero 5 out of 5 stars; 1UP gave the game 10 out of 10 stars and the ratings never dropped below 4.5 stars from a possible 5 stars in reviews from the remaining top gaming industry publications, including Gamespy, GamePro and more!

Freedom V™ Wireless Guitar Controller

The Guitar Mania Experience

If you haven't played the game, you're in for a treat! Within moments of strapping on your rock 'n' roll axe, you'll be playing along with some of the greatest rock hits of all time. The game has different skill settings, and the Freedom V guitar controller truly becomes an instrument at the higher skill levels. Players must use the proper buttons and strum bar techniques to emulate the thrilling guitar work of the best guitar players in rock 'n' roll history! Getting to the top isn't easy, but the game is so infectiously FUN, you've got to get to the top or die! We can't stop playing it in the office, and we know you'll see why so many game critics have said it might just be the "greatest music game of all time" as soon as you plug in! Once you do, the advanced design of the Freedom V guitar controller will become your weapon of choice! No doubt about it! For More Information: www.theguitarmania.com
